***A-CDM Trial Operations***

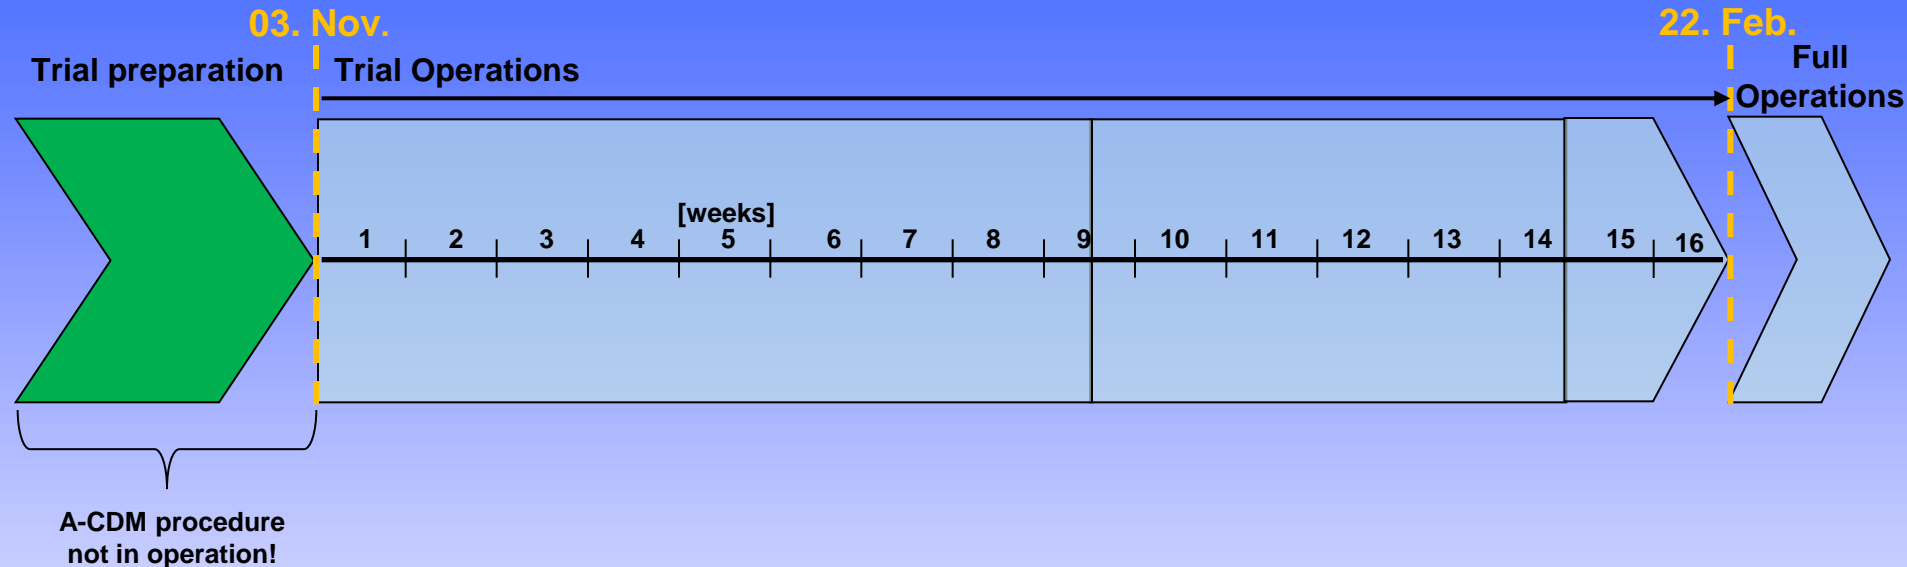

## from project phase to regular operation: objectives of trial operation phase

- 1.) **Local implementation of A-CDM procedure at FRA:  
=> A-CDM process will be standard procedure**
  
- 2.) **Connection to European ATFM network:  
=> several testing phases with CFMU successfully completed**

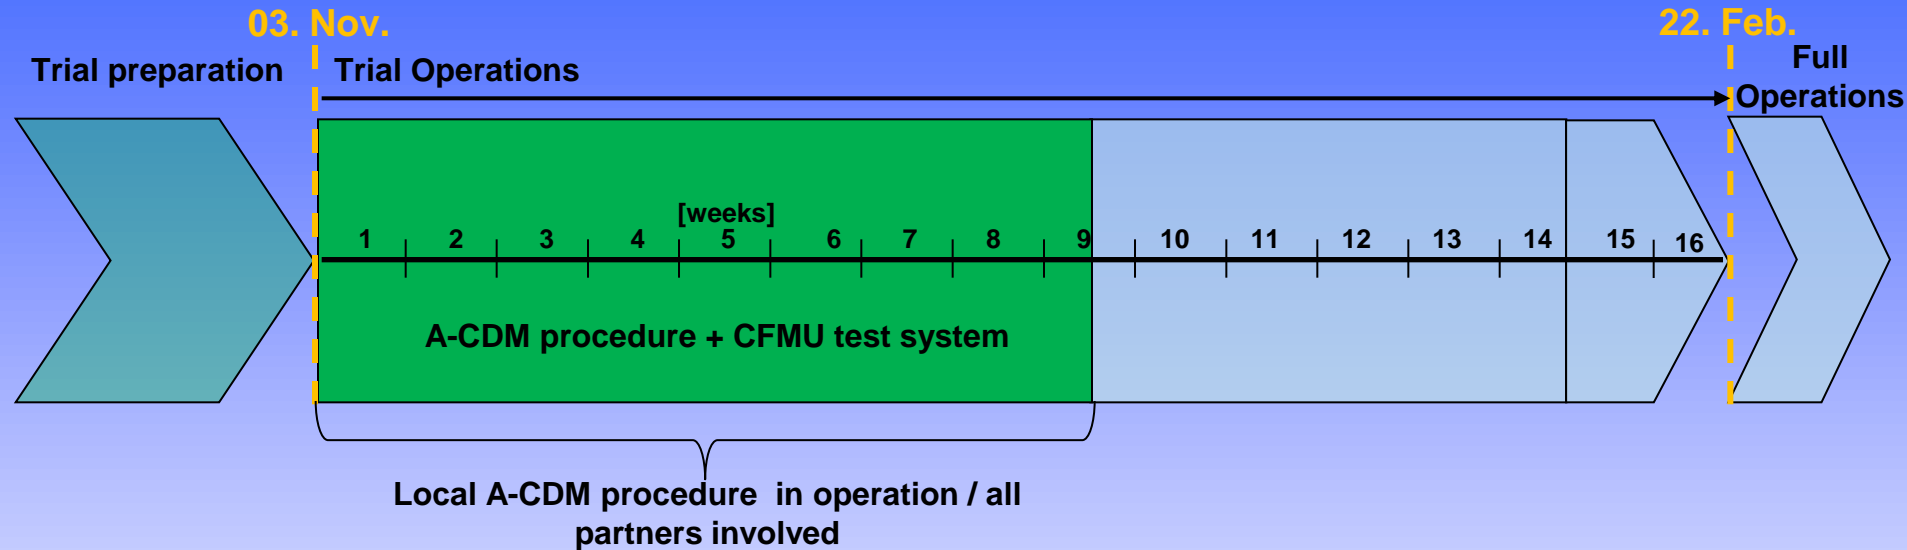

## from project phase to regular operation : **Preparations**

### Preceding activities:

- Fraport and DFS OPS staff training and introduction of new IT-system applications completed
- Communication with customers and users, publications and documentation are ensured:
  - Brief Description, AIC, customer guidelines, information, homepage
  - support office will be established for trial operation phase
- Customers and users prepare for trial operation phase

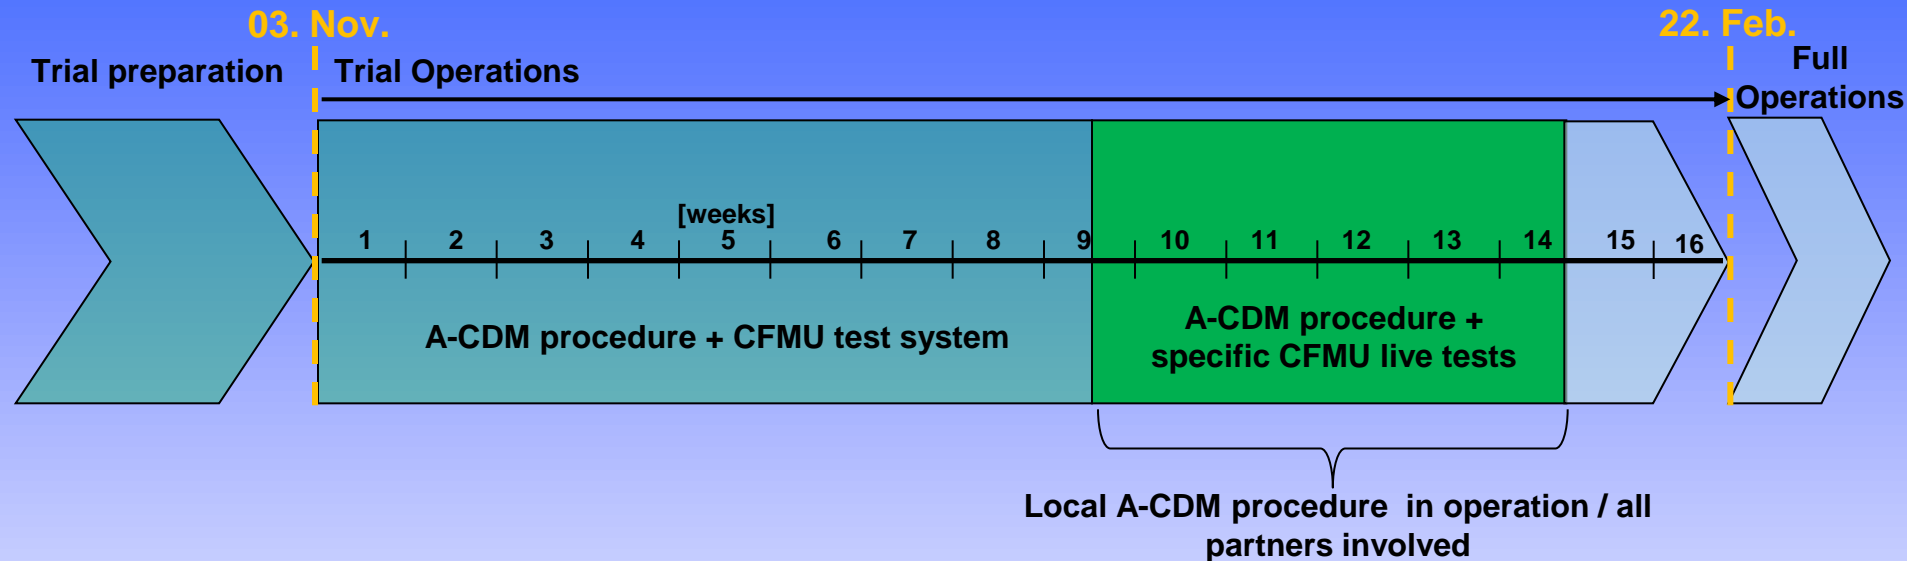

## from project phase to regular operation : **local trial OPS/ CFMU test**

### Trial requirements and implementation:

- Fraport and DFS OPS staff training successfully completed
- Necessary IT-systems have been tested and are available
- Support office is available for customers and users
- Quality control and reliability based on KPI concept
- Involvement of customer and user e.g.:
  - TOBT responsibility
  - A-CDM alerts

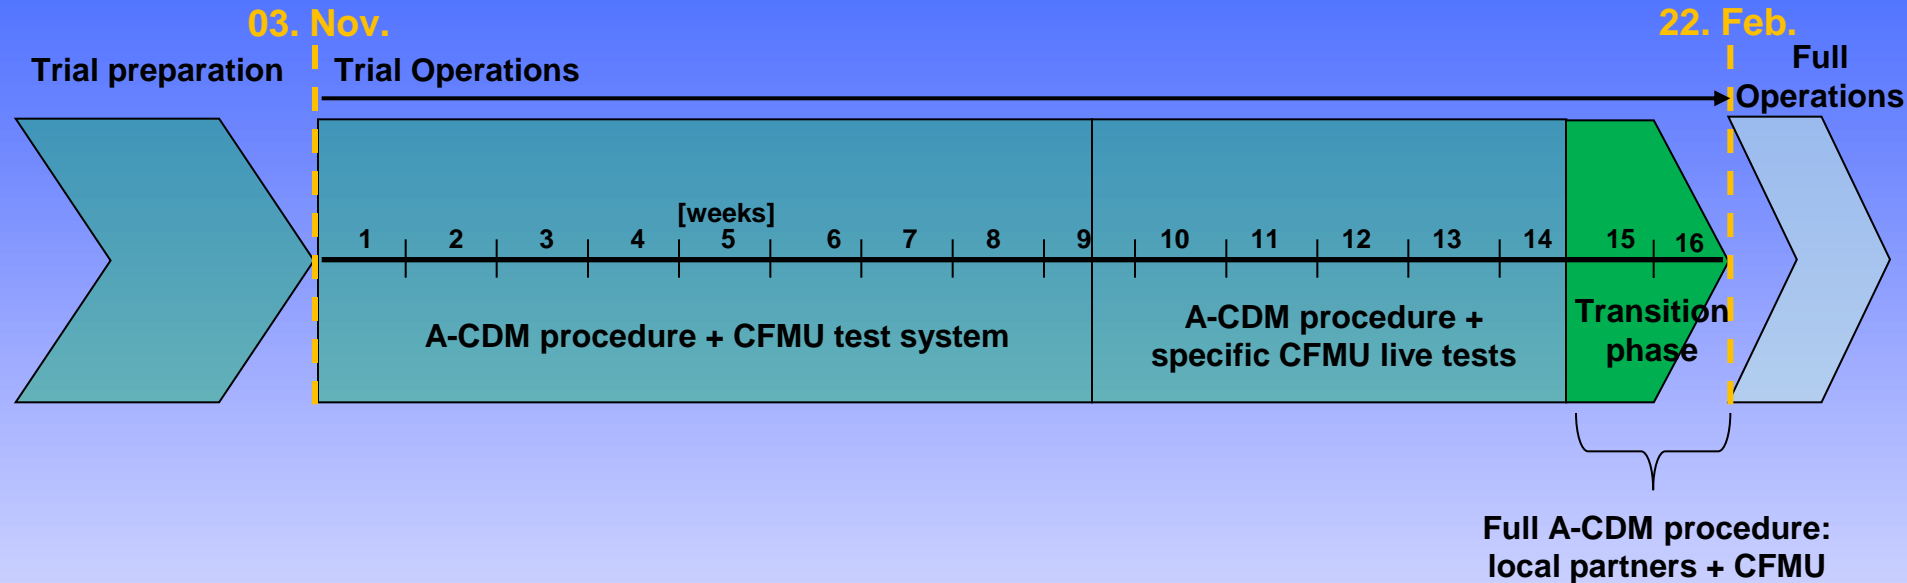

## from project phase to regular operation : **local trial OPS/ CFMU live test**

### Main focus:

- Compliance with procedure
- Observance of quality standards as required by CFMU
- Connection to CFMU live system

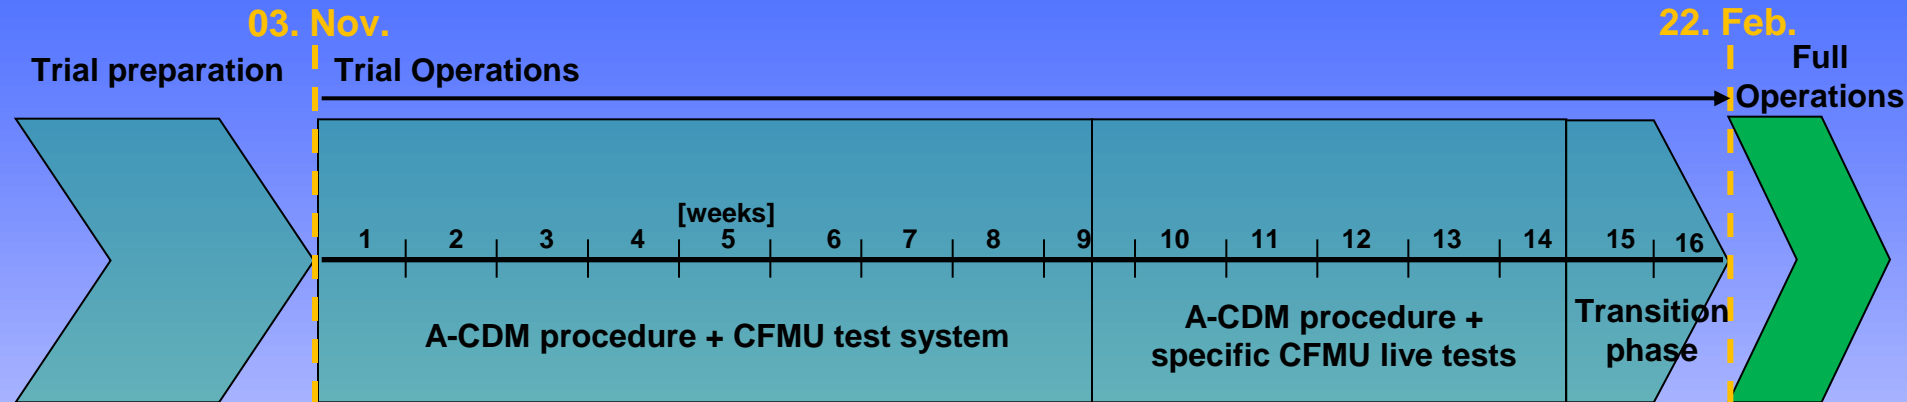

## from project phase to regular operation : *transition phase / CFMU live*

### From trial OPS to regular OPS

- local A-CDM procedure + permanent CFMU live connection
- Smooth transition from trial OPS to regular OPS is ensured
- AIP publication

## from project phase to regular operation : **full operations**

### Regular operation and basic expectations:

- A safe, stable and efficient traffic flow will be ensured
- Implementation of A-CDM as a standard procedure at FRA
- Connection of A-CDM@FRA to European ATFM network
- Quality of process and results: no deterioration of performance compared to previous operation (before A-CDM)
- Permanent quality control and reliability checks by reporting system
- Positive trend in procedural compliance and IT system performance

## from project phase to regular operation : **Summary**

- **Start trial OPS on 3. November 2010**
- **Project team and Support Office is available for customers and users before and during the trial phase**
- **Smooth transition from trial OPS to regular OPS is ensured**
- **Start regular operations on 23. Februar 2011**
- **Permanent quality control will be assured**
